CORDLESS FREEDOM. FOR TOOL AND GARDEN.

At last – no more too short or severed cables.

When you have no longer to worry about extension cables that are too short or sufficient sockets. When the device comes to the project instead of the other way round. When you simply insert the battery and are ready to go, whether it is a lawn mower, garden pump, rotary hammer or wet and dry vacuum cleaner. Than that is the feeling of cordless freedom.

LATEST TECHNOLOGY. PROVEN QUALITY.

For the highest level of safety and performance.

Power X-Change batteries are the core component of our platform. That's why we use only the best components such as high-performance new-generation cells and our intelligent processor-controlled battery electronics. This makes our PXC battery one of the safest in the industry and ensures efficiency, reliability and durability.

POWERFUL MACHINES. LONG-LASTING BATTERIES.

No matter how large your project – Power X-Change won't let you down.

Less power? No way! As a battery system for real enablers, our cordless machines offer up to 2700 Watt of battery power and 8 Ah of capacity, making them easily a match for corded machines! Whether you just want to hang a shelf or drill through a solid concrete wall, with Power X-Change you are equipped to meet any challenge with power and endurance.

1 BATTERY. 1000 POSSIBILITIES. FOR DIY ENTHUSIASTS AND HOBBY GARDENERS.

Just as versatile as you: Battery power for every situation.

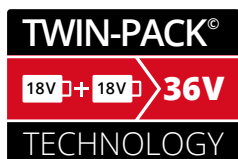

Power X-Change is the first rechargeable battery system that provides hobby gardeners and DIY enthusiasts alike with an unrivaled selection of cordless tools. The PXC family already contains over 250 devices. To enable us to offer you cordless freedom in even more areas of life, we have opened our platform to strong partners. Thanks to the versatile Power X-Change system diverse items from partner companies are "Powered by Power X-Change" – for more information go to page 116.

ACTIVE BATTERY MANAGEMENT SYSTEM. INTELLIGENT ELECTRONIC CONTROL SYSTEM.

The computer-assisted Active Battery Management System permanently monitors and controls all the safety-related processes of the electrical components and associated hardware. This results in a whole range of advantages:

- MAXIMISED RUNNING TIMES
- OPTIMISED TOOL POWER
- LONGER BATTERY SERVICE LIFE
- INCREASED SAFETY

TWIN-PACK® TECHNOLOGY. 18 V + 18 V = 36 V.

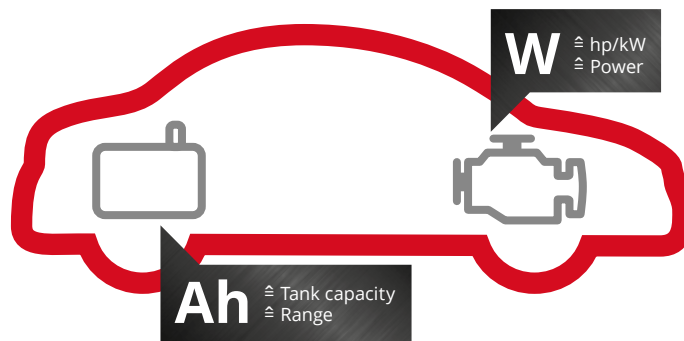

If a device needs more power than provided by a single 18 V rechargeable battery, we simply add a second battery so we generate $18\text{ V} + 18\text{ V} = 36\text{ V}$. We call that Twin-Pack® Technology.

If the voltage (V) gets doubled, the power (W) gets doubled, too. Double Twin-Pack Technology in turn makes it possible to work for even longer still without the nuisance of recharging. In this case, four rechargeable batteries are used. When the power of the first two batteries finally runs out, the system automatically switches over to the two additional batteries.

POWER X-CHANGE PLUS. THE PLUS IN POWER

Rechargeable batteries vary not just in terms of running time and weight. What is also critically important is the power that they provide. With Power X-Change PLUS Technology you get more power per cell, so that you can work with plenty of power even on challenging applications as well.

If, for example, you want to use your angle grinder for cutting work, the running time (see Ah rating) is generally not critical. Sufficient power, on the other hand, is. A car is a useful comparison. Uphill or when overtaking, more power, in other words more hp respectively kW, is needed.

PUREPOWER – INNOVATIVE DRIVE TECHNOLOGY FOR THE HIGHEST DEMANDS.

Various Power X-Change devices are equipped with brushless motors. They offer significant advantages compared to carbon brush motor:

- MORE POWER
- LONGER RUNNING TIMES
- LONGER SERVICE LIFE
- MORE COMPACT DESIGN
- MAINTENANCE-FREE

CORDLESS EXCELLENCE.

CONVINCING. AGAIN AND AGAIN.

“We are incredibly proud to regularly get the best marks in competition with our strongest rivals, underlining our cordless expertise with rechargeable batteries.”

Andreas Kroiss, CEO Einhell Germany AG

CORDLESS EXCELLENCE THAT CONVINCES. ONLY FROM EINHELL.

It became clear to us early on that our customers wanted the freedom of cordless operation. We decided accordingly to concentrate fully on the sector of cordless technology and on the expansion of our Power X-Change system of rechargeable batteries. In numerous product tests carried out by prestigious trade journals and independent experts we have been rewarded with “top marks” and the

position of “best in the test”, confirming the outstanding quality of our products and underlining Einhell’s bundled competence. It is our aim to inspire our customers with Einhell cordless power and to provide them with freedom, fun and enjoyment on all their jobs around the house and garden. This will make Power X-Change a synonym for cordless freedom.

PUREPOWER
BRUSHLESS

TRUE CORDLESS FREEDOM

No perimeter wire required

RAIN SENSOR

for lawn-friendly operation

SEPARATE AREAS OF THE GARDEN

Mowing mode for areas of lawn separate from the main garden

INTUITIVE KEYPAD

Easy to operate thanks to the mowing time programmer for lawn care every day or every two days

CHECKLIST: IS MY GARDEN SUITABLE?

Lawn area of uniformly green colour

Irregularities in colour (e.g. leaves, scorched areas)

Clearly defined and recognisable lawn edges*

No clearly recognisable lawn edges

Simple design, uniform shape

Many separate areas, bottlenecks and recesses

* The lawn area needs to be checked for suitable lawn boundaries

MADE POSSIBLE BY A VIRTUAL FENCE - THANKS TO MAGNETIC TAPE ACCESSORY

Lay the supplied magnetic tape in the garden and it will act like a virtual fence. The magnet sensors installed in the FREELEXO CAM detect the magnetic tape and turn away at its limits. In this way you can create off-limit areas at short notice.

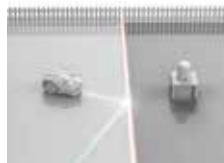

A TEMPORARY OFF-LIMITS AREA

When you want to hold a garden party and need to keep the robot lawn mower at a distance for the duration of the celebrations.

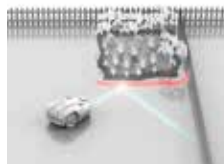

A NEWLY PLANTED TREE

A tree has been newly planted in the lawn area and is still sensitive. To protect it from collisions with the robot lawn mower you can use the virtual fence.

A FLOWER MEADOW IN THE GARDEN

A flower meadow in the garden is just beginning to grow and is attracting the first insects. Now is the wrong time for the robot lawn mower to pass through.

LAWN EDGES MADE BETTER

Lawn edges that are poorly defined or hard to recognise by the robot lawn mower can be upgraded by the magnetic tape for optimum demarcation of the mowing area in the garden.

TWIN-PACK® TECHNOLOGY

If a device needs more power than provided by a single 18 V rechargeable battery, we simply add a second battery so we generate 18 V + 18 V = 36 V. We call that Twin-Pack® Technology. If the voltage (V) gets doubled, the power (W) gets doubled, too.

DOUBLE TWINPACK TECHNOLOGY

DOUBLE TWINPACK TECHNOLOGY

Double Twinpack devices have slots for two additional rechargeable batteries. If, for example, two additional batteries are inserted in the GP-CM 36/47 S HW Li lawn mower, such that all four rechargeable battery slots are filled, you can mow double the area without recharging.

Example (GP-CM 36/47 S HW Li):
 Twinpack 2x 18 V = 350 m²
 Double Twinpack
 2x 18 V + 2x 18 V =
 350 m² + 350 m² = 700 m²

THE POWER X-CHANGE PARTNERS. STRONG COOPERATIONS WITH STRONG PRODUCTS.

“Cordless freedom for everyone.” This is the vision of the Einhell brand. It is widely known already that the cordless screwdrivers, circular saws, lawn mowers and all other members of the Power X-Change team can be operated using one and the same battery. To give our customers access to many more Power X-Change applications beyond the workshop and garden we have opened our cordless platform to cooperation partners from other areas. Diverse platform partners are already using our Power X-Change batteries in their own products – and the number is constantly rising!

IT'S YOUR CHOICE.

+ LIFETIME
MULTI-AH
+ RUNTIME

WHAT DOES MULTI-AH MEAN?

Thanks to MULTI-Ah technology, switching over from a 5 Ah battery to a 8 Ah battery is really easy and can be done with just the push of a button. The 5 Ah battery has a 3x longer total service life and is suitable for lighter applications (e.g. cordless lamp or cordless screwdriver). The 8 Ah battery offers the maximum running time for more capacity-intensive applications (e.g. cordless lawn mower or cordless wet and dry vacuum cleaners)

5 Ah > **300%**
+ more service life¹⁾

8 Ah > **60%**
+ more running time²⁾

¹⁾ In comparison to every standard lithium-ion battery

²⁾ In comparison to the 5 Ah battery

CLIMATE PROTECTION PROJECTS AT CLIMATEPARTNER

To compensate the CO2 emissions of our Power X-Change batteries we are supporting climate protection projects in the areas

of sustainable power generation and marine conservation. The compensation covers CO2 emissions of the battery types 3.0 Ah Plus, 4.0 Ah Plus, 4-6 Ah Multi-Ah Plus and 5-8 Ah Multi-Ah Plus from production to sales.

The climate protection projects selected via ClimatePartner are certified in accordance with international standards such as Verified Carbon Standard (VCS) or Gold Standard (GS) and are regularly checked by independent third-parties. This assures and confirms the climate protection impact of the projects (CO2 reduction) on a regular basis.

4.0 Ah BATTERY – 4.0 Ah PLUS BATTERY. WHERE'S THE DIFFERENCE?

By switching to the new "21700" cell format (21 mm diameter, 70.0 mm length) our latest Power X-Change batteries have acquired the best combination of power/running time and weight.

Why? Using this cell technology it is possible to achieve the same power and running time with five cells instead of the previous ten.

Benefits? The new batteries are 12 % lighter and 13 % more compact than their predecessors – at 100 % power and running time.

Results: Light-weight all-rounders for energy-intensive applications such as in cordless chainsaws.
